EDUCATION

Brown University

Sc.B. Computer Science, A.B. Biology, GPA: 4.00/4.00

Providence, RI

Expected May 2028

EXPERIENCE

Director of Artificial Intelligence

January 2025 – Present

Kyron Medical

Providence, RI

- Leading full-stack development for a Brown University student ran AI startup focused on automating medical billing workflows; accepted into the NVIDIA Inception Program and featured by NBC News and the Boston Globe
- Secured \$4.5M in medical-billing data and established exclusive partnerships with several healthcare organizations generating more than \$100M ARR to develop a secure data pipeline and fine-tune custom models
- Saving billers 250 hours of call time per year by building and fine-tuning HIPPA-compliant, end-to-end AI Agents to autonomously handle calls, generate appeal letters, and streamline payer-provider communication

UTRA Student Researcher

June 2025 – August 2025

Brown University

Providence, RI

- Selected for the Undergraduate Teaching and Research Award to conduct bioinformatics research on small RNA sequencing data, focusing on mitochondrial piRNAs
- Achieved 94% in predicting piRNAs and 85% accuracy of predicting their functions through implementation of a two-layer deep neural network utilizing hybrid sequence features
- Designed and optimized RNA-sequencing pipelines by 30% using batch scripts to analyze smRNA alignments and identify trends in mitochondrial piRNA expression across genomic contexts

AP/SAT Tutor

January 2024 – January 2025

IvyBound Tutoring and Academic Prep

Newington, CT

- Developed tailored study plans focused on AP and SAT subject areas and individual learning needs
- Raised student SAT scores by more than 200 points within 3 months through targeted instruction and mentorship
- Taught AP-level math, SAT reading and writing curriculum, and critical test-taking skills to improve test performance

PROJECTS

Edusona - Personalized Learning Platform | *React, Python, JavaScript, Supabase*

May 2025

- Developed a AI language platform utilizing voice AI for teachers that allows them to assign personalized AI assistants to each student for conversation practice and/or testing
- Enabled teachers to listen student conversations with AI in real time, prompt assistant to say a message, and receive auto-generated end of call reports

Predicting Adverse Drug Reactions | *Python, TensorFlow, SQL*

Dec. 2024 – Jan. 2025

- Trained a deep neural network to predict ADRs from an input drug with 82% accuracy using TensorFlow, leveraging data from over 10 years worth of data from FDA's Adverse Reporting System
- Extracted and preprocessed data using SQL, Pandas, and Python to create a cleaned, processed dataset with 2062 different drugs

AWARDS

Rensselaer Medal

June 2023

Rensselaer Polytechnic Institute

- Received merit scholarship worth \$160,000 for excellence in math and science

Connecticut ARML Team

April 2023

American Regions Math League

- Selected amongst 15 others to represent the Connecticut Team at the national ARML competition

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C, C++, Shell, HTML, CSS

Tools/Frameworks: AWS, Flask, ReactJS, Node.js, Next.js, MySQL, TensorFlow
